

DAWOOD REHMAN

Full Stack Web Developer | LLM Evaluator | Prompt Engineer

rdawood379@gmail.com · +92-314-4885177 · Faisalabad, Pakistan · [linkedin.com/in/dawood-rehman](https://www.linkedin.com/in/dawood-rehman) · dawood-rana.vercel.app · github.com/dawood-rehman

PROFESSIONAL SUMMARY

Full Stack Web Developer and LLM Evaluator with 1.5+ years of professional experience building scalable, production-grade web applications using React.js, Next.js, and Node.js. Specialized in REST API development, MongoDB integration, and UI/UX implementation. Gained hands-on LLM evaluation and prompt engineering experience through collaboration with Turing (US), with expertise in AI output quality assessment and data annotation. Pursuing a BS in Computer Science at GCU Faisalabad. Actively seeking international remote opportunities in full-stack web development and AI engineering.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend Development: React.js, Next.js, Tailwind CSS, Responsive Web Design, UI/UX Implementation

Backend Development: Node.js, REST API Development, Express.js, Authentication & Authorization

Databases: MongoDB, Prisma, Database Design and Integration

AI & Machine Learning: Prompt Engineering, LLM Training & Evaluation, AI Output Quality Assessment, Data Annotation, OpenAI API, Anthropic API

Testing & DevOps: Git, GitHub, Vercel, CI/CD, VS Code, NextAuth, npm, Postman

Core Competencies: System Design, Algorithms & Data Structures, Problem Solving, Analytical Reasoning, Cross-functional Collaboration

WORK EXPERIENCE

Freelance Full Stack Developer

Independent — Remote | March 2026 – Present

- Designed, developed, and maintained production-grade SaaS applications for Final Year Projects (FYPs), including AI Code Gen, StudyBuddy AI, Attendance Management System, and QuizForge, delivering feature enhancements, performance optimizations, bug fixes, and AI-powered capabilities.
- Delivering custom web solutions for clients via LinkedIn and professional networks, covering frontend development, API integration, and deployment on Vercel.

Full Stack Web Developer | LLM Evaluator | Prompt Engineer

InfinitySolTech | July 2025 – March 2026

LLM Evaluation & Testing in collaboration with Turing (US-based AI company)

- Reviewed and evaluated 500+ AI-generated outputs across code generation, instruction-following, and reasoning tasks for Turing (US), scoring against accuracy, coherence, and safety rubrics.
- Engineered and refined 50+ prompt templates through structured A/B testing, measurably improving AI response quality and reducing hallucination rates across evaluation batches.
- Built and maintained 5+ responsive, scalable web applications using React.js, Next.js, and Node.js, implementing code splitting and lazy loading to improve performance.
- Integrated RESTful APIs and backend services to support dynamic, data-driven functionality with seamless frontend-backend connectivity.
- Curated and annotated training datasets through systematic quality assurance workflows, strengthening machine learning model performance.

Website Developer

Gamica Cloud | August 2024 – June 2025

- Developed and delivered 10+ production-ready business websites using Next.js, JavaScript, HTML5, and CSS3, achieving 100% on-time delivery across all client projects.
- Improved website performance through systematic code optimization, image compression, and lazy loading — achieving measurably faster load times and better Core Web Vitals scores.
- Implemented dynamic frontend interfaces and integrated REST APIs to deliver interactive, feature-rich web experiences across 10+ client projects.
- Reduced cross-browser compatibility issues by 80% through systematic testing on Chrome, Firefox, Safari, and Edge during QA cycles.

PROJECTS

AI CODE GEN — AI-Powered UI Code Generation SaaS

Tech Stack: Next.js, TypeScript, OpenAI API, MongoDB, Tailwind CSS, REST API

GitHub: github.com/dawood-rehman/AI-CODE-GEN | Live: ai-layout-gen.vercel.app

- Built a production-grade SaaS platform that generates fully functional UI components and page code from natural language descriptions using a multi-pass OpenAI API pipeline.

StudyBuddy AI — AI-Powered Study Assistant Platform

Tech Stack: Next.js, TypeScript, NextAuth, OpenAI API, Prisma, SQLite, Tailwind CSS

GitHub: github.com/dawood-rehman/study-buddy-ai | Live: study-buddy-ai-drab.vercel.app

- Developed a full-stack AI study assistant featuring AI-generated explanations, quiz generation, and personalized study sessions powered by OpenAI's streaming API.

DAWREM — Premium Pakistani Suits eCommerce Platform

Tech Stack: Next.js, TypeScript, MongoDB, Tailwind CSS, REST API, Authentication

GitHub: github.com/dawood-rehman/DAWREM | Live: dawrem.vercel.app

- Designed and developed a full eCommerce platform featuring product catalog, admin panel, order management system, and automated business workflows.

AI Email Assistant — AI-Powered Professional Email Generation Tool

Tech Stack: Next.js, JavaScript, OpenAI API, Tailwind CSS, REST API, MongoDB

GitHub: github.com/dawood-rehman/AI-Email-Aitomation | Live: ai-email-aitomation.vercel.app

- Built an AI email assistant using OpenAI API and prompt engineering to generate optimized, context-aware professional email responses, improving communication efficiency.

API Key Tester — Multi-Provider API Key Validation Tool

Tech Stack: Next.js, TypeScript, Tailwind CSS, REST API

GitHub: github.com/dawood-rehman/-API-KEYTESTER-2.0 | Live: api-tester-gules.vercel.app

- Developed a developer tool for testing and validating API keys across OpenAI, Anthropic, and other providers with real-time rate limit visualization and multi-key parallel testing.

Mirha Textile — Responsive Business Website

Tech Stack: Next.js, JavaScript, Tailwind CSS, REST API, MongoDB, Authentication

GitHub: github.com/dawood-rehman/Mirha_Textile_Talha | Live: mirha-textile-talha.vercel.app

- Designed and developed a responsive business website for a textile brand featuring a product catalog, user authentication, and optimized navigation for improved online presence.

EDUCATION

Bachelor of Science in Computer Science

Government College University Faisalabad | 2024 – 2028

5th Semester (Current) | Expected Graduation: 2028 | CGPA: 3.45/4.00

Relevant Coursework: Algorithms and Data Structures, Software Development Principles, System Design Fundamentals, Computational Problem Solving, Logical Thinking and Analytical Reasoning, Creative Thinking in Technology Solutions
